Process

Vision and requirements

You bring the vision:
- An innovative business idea.
- A new digital product.
- The drive to digitalise internal workflows.
- The need to automate time consuming processes.

I bring the technical expertise.

Together you and I
- refine the concept behind your vision,
- translate it into clear technical requirements and
- continuously prioritise what matters most.

Process

Implementation and testing

Depending on the requirements, an **implementation** stage typically takes **4-8 weeks**. A period during which we of course stay in contact.

At end of **each stage**, the current version product will be **tested** and **approved** by you. Together, we ensure that the **core features** are built, tested and ready for production.
Process
Launch and maintenance

The final version of the product is ready.
Now it is time to launch 🚀 it, sit back and enjoy the fruits of all the hard work 😋.
Of course, every now and then the system will need a bit of maintenance🛠️.

Conditions

Pricing 💶 and capacity ⌚

The standard **hourly rate** for my services is **90 €**. Depending on the project duration, scope and complexity, we can always find a compromise.

The **workload** will be between **20-40 hours weekly**. You will receive a **weekly summary** of hours worked and tasks completed. We will **schedule a meeting** every **1-2 weeks** (or sooner if needed), to talk about progress and what is coming next.

~~??? €/hour~~

±90 €/hour → **20-40 hrs/week** → **4-8 weeks**

Conditions
Delivery 🚀 and budget 💶

Depending on the requirements, one implementation stage typically takes 4-8 weeks. During each stage, I focus on delivering the next stable and functional version of the product.

Detailed effort estimates are only available for a fee. Let us call it a lesson learned from the past 😊. However, a rough budget can be calculated by using the metrics on this slide ➡️ ±30,000 € for your product.
- Hourly rate ➡️ ±90 €
- Workload ➡️ ±40 hours/week
- Next version in ➡️ ±8 weeks

±90 €/hour

20-40 hrs/week

4-8 weeks

A worthy cause
Streaming 🎥 and podcast 🎙️

A **small request** for a good cause. I run a **podcast on YouTube that highlights the (hidden) champions** within our society. The goal is to explore how their businesses connect with the digital world and to **share inspiring journeys.** Your **participation is optional,** but it could provide valuable insight to those facing similar challenges. And not to forget, the great **opportunity to bring visibility to your business.**
